

IMMANUEL FERNANDES

Full Stack Developer | SaaS Builder | Automation Engineer

+91 77387 54547 | immanuelfernandes369@gmail.com | linkedin.com/in/immanuel-fernandes | github.com/Immanuel-Fernandes

PROFESSIONAL SUMMARY

Full Stack Developer and SaaS Builder with 5+ years of hands-on experience building and deploying production web applications, business platforms, APIs, CMS workflows and automation systems. Strong across the full development lifecycle — from requirements and UI/UX through database architecture, backend development, API integrations, authentication, payments, deployment and optimization. Experienced in solving ambiguous business problems where engineering, automation, growth and user experience intersect. Known for taking ownership from problem → architecture → implementation → deployment → optimization.

ENGINEERING SIGNALS

- Ownership — Take projects from concept and requirements through development, deployment and iteration.
- Problem Solving — Translate business requirements into practical architectures, workflows and maintainable implementations.
- System Thinking — Work across frontend, backend, databases, APIs, authentication, payments and deployment rather than treating them as isolated components.
- Performance & Reliability — Optimize database queries, application workflows, integrations and production deployments with maintainability in mind.
- Automation & AI — Build AI-enabled workflows, agents, integrations and automation for repetitive operational work.
- Business Awareness — Connect engineering decisions with SEO, lead generation, conversion, analytics, UX and business operations.

TECHNICAL STACK

Languages & Frameworks: PHP, JavaScript, TypeScript, Python, HTML5, CSS3, Laravel, CodeIgniter, React

Backend & APIs: REST APIs, Webhooks, cURL, Authentication, Access Control, Third-Party Integrations

Databases: MySQL, MongoDB, Database Design, Query Optimization, Backups & Migrations

Deployment & Infrastructure: Git, GitHub, SSH, Hostinger, cPanel, XAMPP, Staging & Production Deployment

AI & Automation: AI Agents, LangChain, Gemini API, HuggingFace, AI Builder, Python Automation, Chatbots

Payments & Security: Payment Gateways, Callbacks, Webhooks, Refund Workflows, Transaction Verification, Secure Data Handling

Growth Technology: SEO, AISEO, GEO, SERP Analysis, Schema, UTM Tracking, Google Analytics, Google Tag Manager

UI/UX & Creative Technology: Figma, Photoshop, Illustrator, Canva, Responsive UI, Branding, Video & Motion Content

PROFESSIONAL EXPERIENCE

CO-FOUNDER / FULL STACK DEVELOPER — URLZY | SaaS / Digital Infrastructure

April 2026 – Present

- Architect and develop production web applications using PHP, JavaScript, Python, HTML5 and CSS3.
- Design and maintain database-backed systems using MySQL and MongoDB.
- Build URL-shortening and dynamic digital-link workflows spanning QR codes, WhatsApp links, bio pages and multi-links.
- Integrate REST APIs and third-party services into production workflows.
- Design systems where destination data can be updated without requiring users to recreate physical QR assets.
- Handle authentication, access control, validation and secure application workflows.
- Own the product-development cycle from feature concept and architecture through implementation, deployment and iteration.
- Apply product, UX, SEO and automation thinking alongside engineering decisions.

Evidence: SaaS architecture · API integration · database design · product ownership · automation · security · deployment

FREELANCE FULL STACK DEVELOPER — LEVIVRE | E-commerce Platform

- Developed responsive business and e-commerce functionality using PHP, JavaScript, Python, HTML5 and CSS3.
- Designed and maintained MySQL/MongoDB-backed application workflows.
- Integrated REST APIs and external services into business processes.
- Implemented payment-gateway workflows covering processing, callbacks, webhooks, refunds and transaction-status verification.
- Implemented authentication and access-control mechanisms with secure data handling.
- Worked across frontend, backend, database and infrastructure layers with focus on maintainability, performance and production reliability.

Evidence: payments · backend architecture · security · APIs · databases · production development

FREELANCE DIGITAL GROWTH & CREATIVE SPECIALIST — KOHINOORGEMS

- Designed and developed a dedicated SEO-focused web property without modifying the primary website.
- Implemented SEO, AISEO and GEO strategies across keyword, semantic-content and AI-search optimization.
- Performed SERP analysis and developed search-focused content and blogging strategies.
- Built backlink strategies connecting supporting digital assets with the primary website.
- Implemented UTM campaign tracking to improve attribution and referral visibility.
- Created AI-assisted promotional creatives, banners and digital branding assets.

Evidence: technical SEO · analytics · AI-assisted workflows · growth engineering · independent execution

Immanuel Fernandes · Full Stack Developer | SaaS Builder | Automation Engineer

FULL STACK WEB DEVELOPER / PROJECT DEVELOPER — SAHAYINI NGO WEBSITE

- Designed and developed a responsive website representing mission, activities, centres, events and initiatives.
- Built structured content-management workflows for events and photo galleries.
- Designed organized data structures for events, photographs, centres and activities.
- Focused on maintainable content administration, usability, discoverability and straightforward workflows.

Evidence: CMS architecture · structured content · UX · maintainability · end-to-end delivery

FOUNDER / PROJECT LEAD — SOIL ENTHUSIAST | 2024 – Present

- Built a sustainability-focused digital venture combining technology, content, design and digital growth.
- Applied MERN-stack concepts to product development.
- Worked across startup ideation, product development, creative direction and digital marketing.

FREELANCE GRAPHIC DESIGNER, VIDEO EDITOR & WEB DEVELOPER — IMAGE VIDEONATION | 2020 – 2025

- Delivered end-to-end digital projects spanning web development, graphic design, video editing, animation and branding.
- Created websites, landing pages, banners, posters, invitations, certificates, logos and social-media assets.
- Managed projects from concept through design, production and final delivery.

SELECTED PROJECTS

URLZY — Digital-Link & URL Platform

URL-shortening and digital-link platform combining URL management, QR codes, WhatsApp links, bio pages and multi-link functionality. Focus: SaaS · PHP · MySQL · APIs · QR infrastructure · automation · product engineering

AI Agriculture Platform

Concept involving crop recommendations, fertilizer guidance, weather information, market-price information and plant-disease functionality using data and AI concepts.

Real-Estate & Business Web Platforms

Production websites and digital systems involving responsive interfaces, CMS/admin workflows, databases, landing pages, CTA optimization and marketing integrations.

Sahayini NGO Platform

Responsive organizational website with structured event and photo-management workflows.

Instant File Transfer

Streamlit-based file-transfer application incorporating temporary-file expiry and practical deployment considerations.

EDUCATION

B.Sc. Information Technology — S.I.W.S. College, Wadala | 2022 – 2025 | First Rank Holder

Higher Secondary — Information Technology — S.I.W.S. College, Wadala | 2020 – 2022

Secondary School — Don Bosco High School, Matunga | 2008 – 2020

CERTIFICATIONS

- Microsoft Azure Fundamentals: Describe Cloud Concepts — Microsoft, 2023
- Get Started with AI on Azure — Microsoft, 2023
- Introduction to GitHub Copilot — Microsoft, 2023
- Get Started with AI Builder — Microsoft, 2023
- Build Effective Bots with Power Virtual Agents — Microsoft, 2023
- Introduction to .NET — Microsoft, 2023
- Write Your First C# Code — Microsoft, 2023

ADDITIONAL EVIDENCE

750+ videos created · 150+ brochures created · AI agents & automation · API integrations · SaaS · Power BI · Tableau · QGIS · IoT & embedded systems · SEO / AISEO / GEO · graphic design · video editing · animation
